

Ready. Resistant.  
Reliable. Industrial.

# AUTOMAC 38 PIÙ

EN

The automatic packaging machine model **Automac 38 Più** for the packaging of fresh products contained in trays, is particularly suitable for use in supermarkets, superstores and mid-sized packaging centres. Made completely of stainless steel, aluminium and plastic materials, it is compact and very versatile. Thanks to the 5 configurations possible, **Automac 38 Più** responds to the diverse needs of our customers, in terms of size and space available. The two reels always in motion, allow for fully automatic wrapping, without interruption in production for the replacement of the film strip in accordance with the workable formats.

### Main characteristics

Automac 38 Più configuration Z5

### 5 available configurations

Automac 38 Più meets all the needs of possible production layouts: it is the only packaging machine in the world that offers this possibility.

### Easy access to the internal parts of the machine

The 5 available openings allow for easy access to internal parts for operations of periodic cleaning and regular maintenance. The absence of mechanical parts under the lift ensures the highest levels of hygiene and cleanliness.

### 2 film reels always ready to package

The two independent reels are always ready to use and guarantee the most efficient film consumption, able to manage a reel with reduced width on one side and one with a larger width on the other. In conjunction with the dedicated optional feature, Automac 38 Più can automatically read the format of the tray, selecting the most appropriate reel without any intervention of the operator, therefore ensuring flexibility, high average speed and constant production.

### Possibility of selecting 2 speeds for optimal wrapping of the trays

Speed: 21 and 31 packages a minute. It is possible to choose the most suitable speed for the tray to wrap in order to facilitate its packaging (for example, a tray with high centre of gravity).

### Mission: to package trays of every shape, colour and size, always and well

Automac 38 Più guarantees the packaging of every tray type, of the most varied shapes and colours. The product is packaged with particular attention to the sealing of the tray underside: the end sealing belt is designed to optimise the sealing of the film without overheating the tray.

### Plug-and-Pack!

Automac 38 Più is powered by 208, 230 or 400 V without any need for compressed air.

### Reel substitution in less than 45 seconds

Changing the reel is fast and easy: it takes less than 45 seconds. Moreover the always in motion second reel reduces this time even more, to less than 30 seconds. The reduced weight of the reel facilitates replacement by the operator.

### Ideal for packaging of fresh and very fresh products

Meat, fish, fruit, vegetables, gastronomy, cheese, and more.

### Safety before anything else!

Each part of Automac 38 Più has been designed in compliance with the most severe regulations on operator safety. In addition, the rounded design of the safety guard eliminates accidental impact during movement in the vicinity of the packaging machine.

**5** Exit configurations available.

**32** Optional features from the list.

**31** Maximum speed: 31 packages a minute.

**45** Seconds to change the reel.

**99** Wrapping programmes available.

**280** Stretch film. Min reel width.

**550** Stretch film. Max reel width.

**380** Weight 380 kg, machine with standard configuration.
